Winter Anderson recently divorced,, is determined to have a good time at the Elk's Lodge picnic. On the drive out to the lodge, she and Bailey, her best friend, are forced into following a slow moving truck.

Winter decides she wants a picture of herself in front of the big truck. After Bailey snaps her picture, Winter realizes her dress is caught on the bumper. The owner of the truck, Brogan D-Taur, comes along and takes care of Winter's dress. Her animal attraction for him has her hopping inside his truck. He takes her to a remote cabin. What Winter wants is not what Brogan has in mind for her.

Brogan reveals he has been sent from another planet to fetch her back for the high commander Ichori. Ichori saw her picture and wants her for himself. She agrees to go, only because she wants Brogan. Her best friend, Bailey, decides to travel to the faraway planet, too.

On the journey back, Winter and Brogan realize their feelings for each other and that their fate has been sealed by another.

*The Chronicles of Winter* is a fast paced, scorching hot read. Winter is a daring woman, who goes after what she wants. Brogan is a noble, sexy hunk, who plans to carry out his orders. This book captivated me from beginning to end.
