Take it to the limit is exactly what Cindy Gerard did with this book of intrigue and suspense. From page one we are drenched in rain right along with ex-secret agent Eve Garrett as she waits for her friend, Tiffany, only to have her life threatened by an attacker. Worried for the safety of her missing friend, she begins searching for her and finds sexy ex-cop Tyler "Mac" McCain instead, who's following the same trail.

It's an explosive reunion in more ways than one. Especially since he broke her heart back in high school.

Eve is determined to find Tiffany before Mac does. She stays one-step ahead of him most of the way, even with the foiled attempts on her life.

Doubling their efforts, they team up, and soon they are hot and bothered, especially by each other. But will they find Tiffany before she and Eve get killed?

I chuckled aloud more than once at the quick witted repertoire between Eve and Mac. The heat between these two had the book coming apart at the seams! Definitely a keeper!
